Education

Rutgers University–New Brunswick

Expected May 2028

Bachelor of Science in Computer Science, Statistics/Mathematics and Data Science

GPA: 3.6/4.0

Relevant Coursework: Data Structures and Algorithms, Discrete Structures I & II, Multivariate Calculus, Elementary Differential Equations, Linear Algebra, Computer Architecture, Statistical Learning, Inference for Data Science

Professional Experience

GE Appliances - A Haier Company

Aug 2026 – Present

Software Engineering Intern

Louisville, KY

- Built Firebase logging across Android-based appliance features used on 10,000+ connected appliances, improving beta issue tracking and debugging.
- Improved a time-based appliance feature by 30%, increasing accuracy and reliability across OTA releases.
- Developed and tested embedded appliance features using Kotlin, Dart, and Flutter across appliance display systems.
- Applied TDD in C/C++ to build unit and integration tests for embedded software, catching regressions earlier and improving release reliability.

UPS Store

Dec 2025 – Aug 2026

Store Technician & Internal Developer

New Brunswick, NJ

- Configured routers, switches, IP addressing, and secure Wi-Fi across store devices and POS systems.
- Built a React/Express/MongoDB operations portal with 4 role-based access levels, making daily workflows 75% faster.
- Designed a multi-store architecture with 1 master database and separate databases for store locations, improving data isolation and access control.

Projects

JPMorganChase Software Engineering | Java, Spring Boot, Kafka, JPA, H2, Maven

2026

- Integrated Kafka into a Spring Boot service to consume, deserialize, and process transaction messages.
- Implemented transaction validation and persistence using Spring Data JPA and an H2 relational database.
- Integrated an external REST Incentive API with RestTemplate and incorporated responses into transaction processing.
- Built and debugged automated Maven tests across message ingestion, database operations, and API integrations.

DegreeFlow | Python, MongoDB, Web Scraping

2026

- Built a recursive scraper that collected and organized 5,000+ pages of course, program, and prerequisite data from PSU websites.
- Designed a MongoDB pipeline with indexed academic data, reducing information retrieval time by 70
- Developed the backend for personalized degree flowcharts covering 100+ academic pathways and course relationships.

TruthLens | TypeScript, FastAPI, Firebase, HuggingFace, Docker

2026

- Built a Chrome extension that detects AI-generated images and videos in real time using a HuggingFace ViT classifier.
- Developed a FastAPI and Firebase backend for media analysis, user analytics, and browsing-session tracking.
- Created a family dashboard to monitor media authenticity across browsing sessions.

CureByte | React, JavaScript, AWS Amplify, Google Generative AI

2024

- Built and deployed an AI-powered medical education platform that reduced manual note-review time by 60%.
- Integrated Google Generative AI to process and structure over 100+ medical data points into useful learning material.
- Designed a responsive React interface that streamlined multiple medical-student workflows for reviewing and generating medical notes.

Stock Market Simulator | Java, Spring Boot, MySQL, JavaScript, Yahoo Finance API

2024

- Built a full-stack trading simulator supporting real-time market data for 500+ stocks through the Yahoo Finance API.
- Developed a Spring Boot and MySQL backend handling 1,000+ simulated transactions across user portfolios.
- Improved market-data retrieval and portfolio updates by 40% through optimized API and database operations.

Technical Skills

Frameworks/Libraries: Spring Boot, FastAPI, React.js, Node.js, Flutter, Spring Data JPA, Hugging Face

Languages: Java, Python, C, C++, Kotlin, JavaScript, TypeScript, Dart, SQL, HTML/CSS

Databases/Cloud: MongoDB, MySQL, Firebase, Firestore, AWS, Google Cloud, AWS Amplify

Developer Tools: Git, GitHub, Docker, Maven, Kafka, Unix/Linux

Other Skills: REST APIs, TDD, Unit/Integration Testing, CI/CD, OOP, Agile
